

THE REGIONAL MUNICIPALITY OF PEEL

HYDRANT PERMIT EXTENSION TO TAKE WATER FROM FIRE HYDRANTS AFTER OCTOBER 15, 2021 UNDER BACKFLOW PREVENTION BY-LAW 10 -2017 AND WATER BY-LAW 6-2017 (as such By-Laws may be amended from time to time).

Hydrant permit extensions are required after October 01, 2021 for hydrants in Caledon and October 15, 2021 for hydrants in Brampton and Mississauga for permit holders in order to have access to water from Fire Hydrants.

- The application for Permit extension must be received at backflowprevention@peelregion.ca by the date of the permit deadline. If extension requests are not received, backflow assemblies at hydrants will be removed by the following week.
- This application will be subject to review, and successful candidates will receive confirmation of extension via email. The extension will be valid until December 15, 2021, at which point the extension will expire and another extension is required should Permit holders require further access to water.
- Regional Staff will be conducting an inspection on the insulated box and test the Backflow assembly prior to the extension being granted.
- Fees will be assessed and forwarded to applicants in a final bill at the end of the Permit term.
- All the original permit conditions will still apply.

Applicant Information: (Please Print) Private equipment ☐ OR Regional equipment ☐

Permit number: _____

Name of applicant: _____

Legal Registered name of Business: _____

Phone number: _____

Email address: _____

I (pls. print first and last name) _____ agree to comply with the Region of Peel specifications for an insulated box and uninterrupted heat source as provided to me, in order to have access to water from a Fire Hydrant.
